

THE JUNE ROUNDUP

Featured Cleanup Site and June Results

Take a deeper dive into our featured cleanup site of the month, Muliwai'ōlena, and review our stats from the month of June

808 Cleanups is the official steward of Muliwai'ōlena, a cultural site located in Waimānalo. Volunteers meet every other Monday from 3-5 to remove invasive plants along the coastline, allowing us to reintroduce native plants back into the environment. Learn more about our work and goals, and RSVP to join a cleanup soon.

RESTORATION

Rebuilding the Dunes

Sand dunes provide much needed protection from tidal surges but have been eroded by climate change and invasive species.

NEW GROWTH

Native Plants

Restoring native plants in the area helps capture sand and strengthen the dunes. They also create nesting spaces for native birds.

WORKING TOGETHER

Stewardship

Many different groups are affected by the erosion, and we have several partners who pitch in to care for this special site. We hope one day the coastal sand dunes will be restored to provide natural protection for all.

JUNE BY THE NUMBERS

**Total
Cleanups:**

67

**42 Sq. Ft.
Native
Species
Planted**

**15,221 LBs
of Trash
Removed**

**19,706 Sq. Ft.
Invasive
Species
Removed**

688 Volunteers

Please consider supporting our programs with a financial contribution so that we can continue our work around O'ahu.
