

Aloha Stellar Stewards,

We've been busy this month! 708 volunteers took part in 53 cleanups to collect almost 5,700 pounds of trash, from cigarette butts to fishing lines to tires.

A large part of our work is removing invasive plants so that we can restore native plant species. Together we cleared over 25,700 sq. ft. of invasive species and added 91 sq. ft of native planting. Watch our video below to see what is involved in removing invasive species.

As always, we can't thank you enough for being a part of our community and look forward to continuing our work.

Stay tuned for more news and updates next month!
